Give your family extra safety and convenience this festive season – and enjoy the security of a Nice-operated garage door throughout the year. The super-dependable Nice “DC Blue Advanced” garage door motors are South Africa’s favourite range. Not even loadshedding can stop them: they work off battery during power outages, and directly off the mains, even with the battery disconnected.

The Hi-Speed model is now available; it’s the fastest on the market, providing extra secu... **See more**

Keeping our community’s most vulnerable children safe is not just Nice. It’s a necessity. So when we at Nice realised Durbanville Children’s Home needed a new gate motor (operator) for their entrance security gate we donated a Drive600 ACDC Gate Motor. We also spoiled them with an Accentronix Infinity cloud-linked GSM control system to safely manage their staff’s transmitters that they use to access the premises online. Now the more than 140 children cared for at one of South... **See more**

Holidays are times for visiting friends and family. But peak season can also bring unwelcome elements. A hard-working traffic barrier from the Nice “Access” range assures your complex of a lifetime of trouble-free access control. Various boom lengths and permutations available. All barriers compatible with Nice remotes. #DidYouKnow: Nice barriers operate even during loadshedding. They are battery independent: they work off the battery, or off the mains, even when the battery ... **See more**

Nice’s true-blue, SA born and bred Drive range of sliding gate operators (motors) are designed and built to handle the toughest local challenges. A Nice gate motor gives you speed, smooth operation, dependability and the ability to open and close over 100 times during power outages. Plus, it works even when the battery is removed. And for extra peace of mind, it comes with a built-in tamper alarm. View the range on <https://www.niceforyou.com/>

DC Blue from Nice is Africa’s favourite range of garage door operators. They’re tough, hard-working and very smart. How smart? Unlike some other makes, the Nice DC Blue Pico, Advanced, Advanced Hi-Speed and ROLL-UP work directly from the mains, and use their battery truly for backup; the power is not fed through the battery first. The battery is not there to relay the power; its purpose is to provide true backup, for instance during loadshedding. This means a DC Blue from Nic... **See more**
